DiagnoSearch

DiagnoSearch IWRS

Engineered for Precision. Built for Speed.

Designed for flexibility and compliance, Wide-Angle-Insights IWRS solution simplifies the operational complexity of clinical trials by connecting participant randomization, treatment allocation, and investigational product supply management in one controlled system - helping study teams manage critical trial processes with greater confidence and control.

50+
Projects Configured

70,000+
Participants Randomized

157,000+
Doses Allocated

Services Offered

Randomization & Treatment Allocation

- Flexible randomization approaches
- Algorithm-based kit allocation method

Investigational Product Supply Management

- Real-time inventory tracking
- Proactive threshold alerts
- Expiry management

Access Control

- Separate role-based access for blinded and unblinded teams

Real-Time Visibility

- Live study-level inventory status
- Real-time reports
- Configurable notifications

Compliance

- Complete audit trail
- Controlled workflows

The IWRS Advantage

- **Seamless System Integration**
- **Adaptable to Study Needs**
- **Designed for Global Studies**
- **From Randomization to Supply**
- **21 CRF Part 11 Compliant**
- **Dedicated Support Team**
